MANAGEMENT DISCUSSION AND ANALYSIS REPORT

An Overview:

The Indian economy embarked on a high growth path right since 2003-04 with a GDP growth of over 9% in 2007-08. There has been a tremendous improvement in production and performance across all the sectors accompanied by buoyancy in capital markets. But a downtrend has started from January, 2008 due to the rising inflation and global happenings. Year 2007-08 was a remarkable year for the economy where the stock market indices surpassed the best of the expectations, reaching all time high. But, certain global happenings Viz. sub prime problems, rising crude prices coupled with local negative factors viz. rising inflation and political uncertainties has brought the markets down by the end of the year.

But India is still poised to achieve a GDP growth of about 8.0% during 2008-09 as the major fundamentals remain intact which will keep the markets going well. The overall turnover on the bourses though dropped from the peak is still not that bad.
