

**Dr. Ashok Ajmera (FCA), CMD & CEO**

Dr. Ashok Ajmera's column as on Oct. 03, 2021

**Benchmark indices were under pressure; stock specific approach recommended..**

- 1) India's benchmark indices were under pressure last week. The Sensex witnessed a fall of 2.14 percent or 1,282.89 points to close at levels of 58,765.58. On the other hand, Nifty was down by 321.15 points or 1.80 percent to end at levels of 17,532.05. The fall can be attributed to weak global cues like rising US Treasury yields and China's economy coming under pressure.
- 2) However, the broader markets witnessed good positive upmove and ended the week in positive terrain. The BSE Midcap index was up by 0.12 percent and BSE Smallcap index was up by 0.69 1 percent in the week gone by.
- 3) During the week, Foreign institutional investors (FIIs) were net sellers. FIIs have net sold equities worth Rs. 6,092 crore. On the other hand, domestic institutional investors turned net buyers and bought equities worth Rs. 4,305 crore during the week.

**Key recent major developments..**

- 1) The gross GST revenue collected in the month of September 2021 stood at Rs. 1,17,010 crore, which is 23 percent higher than the GST revenues in the same month last year. During the month, revenues from import of goods was 30 percent higher and the revenues from domestic transaction (including import of services) are 20 percent higher than the revenues from these sources during the same month last year. The revenue for September 2020 was, in itself at a growth of 4 percent over the revenue of September 2019 of Rs. 91,916 crore. For this September, CGST collections were Rs. 20,578 crore, SGST Rs. 26,767 crore, IGST Rs. 60,911 crore (including Rs. 29,555 crore collected on import of goods) and cess Rs. 8,754 crore (including Rs. 623 crore collected on import of goods). The average monthly gross GST collection for the second quarter of the current year has been Rs. 1.15 lakh crore, which is 5 percent higher than the average monthly collection of Rs. 1.10 lakh crore in the first quarter of the year. "This clearly indicates that the economy is recovering at a fast pace. Coupled with economic growth, anti-evasion activities, especially action against fake billers have also been contributing to the enhanced GST collections. It is expected that the positive trend in the revenues will continue and the second half of the year will post higher revenues," the government said.
- 2) The Manufacturing Purchasing Managers' Index, compiled by IHS Markit, rose to 53.7 in September from 52.3 in August, staying above the 50-level separating growth from contraction for the third straight month. "Indian manufacturers lifted production to a greater extent in September as they geared up for improvements in demand and the replenishment of stocks," noted Pollyanna De Lima, economics associate director at IHS Markit. "There was a substantial pick-up in intakes of new work, with some contribution from international markets." Improvements in both domestic and overseas demand saw new orders expand at a quicker pace in September and factories raised output at a significantly faster rate compared to August. However, that failed to encourage factories to hire more workers - a much needed step to boost weak labour market conditions - and instead they reduced their workforce at

**AJCONGLOBAL**  
YOUR FRIENDLY FINANCIAL ADVISORS

the sharpest pace in four months. "Companies continued to purchase extra inputs in September, but jobs were little changed over the month. In some instances, survey participants indicated that government guidelines surrounding shift work prevented hiring," added De Lima.

- 3) The centre's fiscal deficit for April-August came in at Rs. 4.7 lakh crore, or 31 percent of the full year budget estimate, official data showed on September 30. Finance Minister Nirmala Sitharaman had budgeted a fiscal deficit target of Rs. 15.07 lakh crore, or 6.8 percent of nominal gross domestic product, for FY22. The fiscal deficit for FY21 was revised to Rs. 18.49 lakh crore, or 9.5 percent of GDP, from a budget target of 7.96 lakh crore, or 3.5 percent of GDP.
- 4) Net direct tax collection grew 74.4 per cent to Rs. 5.70 lakh crore between April 1 to September 22 this fiscal, the Finance Ministry said on Friday. The net direct tax collection of Rs. 5,70,568 crore after adjusting for refunds includes Corporation Tax (CIT) at Rs. 3.02 lakh crore and Personal Income Tax (PIT) at Rs 2.67 lakh crore. The net collection (April 1 to September 22) in FY 2021-22 has registered a growth of 27 per cent over 2019-20 fiscal when the net collection was over Rs 4.48 lakh crore. In the previous fiscal (2020-21), the net collection was over Rs 3.27 lakh crore. The gross direct tax collection for 2021-22 fiscal stands at over Rs 6.45 lakh crore, compared to Rs 4.39 lakh crore in the corresponding period of the preceding financial year, registering a growth of 47 per cent over last fiscal. The gross collection was 16.75 per cent higher than Rs 5.53 lakh crore collected in 2019-20 fiscal (April-September 22). The Gross CIT mop-up was Rs. 3.58 lakh crore and PIT was over Rs. 2.86 lakh crore. Refunds amounting to Rs. 75,111 crore have also been issued so far this fiscal.
- 5) Finance Minister Nirmala Sitharaman, who chaired the first in-person GST Council meet held since the outbreak of the coronavirus pandemic, said: "The issue of petrol and diesel was discussed. Several states said they do not want to bring these under GST. The Council also felt it was not time to bring petrol and diesel under GST. In addition, GST Council on Friday decided to charge food delivery platforms such as Swiggy and Zomato a tax even as it extended concessional tax rates on certain COVID-19 drugs by three months till December 31.
- 6) Earlier, Finance Minister Nirmala Sitharaman announced a formal government guarantee on the securities receipts that the planned 'bad bank' will issue to banks as it takes on non-performing assets from their books. The government guarantee will be Rs. 30,600 crore, she said. The Union Cabinet on Wednesday cleared a proposal to provide government guarantee to security receipts issued by the National Asset Reconstruction Company (NARCL) as part of resolution of bad loans, Sitharaman said at a press briefing in New Delhi. NARCL proposes to acquire stressed assets of about Rs 2. trillion in phases within extant regulations of RBI. NARCL will pay up to 15 per cent of the agreed value for the loans in cash and the remaining 85 per cent would be government-guaranteed security receipts. "Substantial amount of NPAs continue on balance sheets of banks primarily because the stock of bad loans as revealed by the Asset Quality Review is not only large but fragmented across various lenders. High levels of provisioning by banks against legacy NPAs has presented a unique opportunity for faster resolution," said Ministry of Finance on the rationale for setting up the bad bank. The Finance Minister in Budget 2021-22 announced that the high level of provisioning by public sector banks of their stressed assets calls for measures to clean up the bank books. The guarantee will be valid for 5 years. "15% cash payment will be made to banks for NPAs based on some valuation, 85% will be given as Security Receipts. For Security Receipts to have their value intact, Govt has to give a backstop arrangement, hence the govt guarantee of Rs. 30,600cr cleared by Union Cabinet," said Sitharaman.
- 7) In big bang reforms for Telecom Sector (Structural and Procedural Reforms), the Union Cabinet approved a relief package for the telecom sector that includes a four-year moratorium on payment of statutory dues by telecom companies as well as allowing 100% foreign investment through the automatic route. Telecom Minister Ashwini Vaishnaw said nine structural reforms for the telecom sector were approved. The definition of AGR, which had been a major reason for the stress in the sector, has been rationalised by excluding non-telecom revenue of telecom companies. AGR refers to revenues that are considered for payment of statutory dues. "PM Modi took a bold decision over AGR (adjusted gross revenue) today. A decision has been taken to rationalise the definition of AGR. All non-telecom revenue will be taken out of AGR. There was a regime of heavy interest, penalty & interest on penalty on payment of license fees, spectrum user charges and all kinds of charges. It has been rationalised today. Annual compounding (of interest) will be done instead of monthly compounding. A reasonable interest rate of MCLR + 2% interest rate has been offered and the penalty has been completely scrapped. This will pave way for large-scale investments in the telecom sector. Investment means employment - more the investment, more the employment," said Vaishnaw at a press briefing in New Delhi. "For future auctions, duration of spectrum will be 30 years instead of 20 years. Also if someone takes spectrum & business conditions/technology changes then after a lock-in period of 10 years it can be surrendered by paying spectrum charge. Spectrum sharing is also being completely allowed, it has been made completely free," added Vaishnaw. Mr. Vaishnaw said the reforms are applicable from October 1 and none of them are with retrospective effect. "There will be further reforms when 5G spectrum is auctioned," he added.

- 8) The Union Cabinet approved a Rs. 26,058 crore production linked incentive (PLI) scheme for auto, auto components and drone industries to enhance India's manufacturing capabilities, Union Minister Anurag Thakur said on Wednesday. The PLI scheme will incentivize the emergence of advanced automotive technologies' global supply chain in India. It is estimated that over a period of five years, the PLI scheme for the automobile and auto components industry will lead to fresh investment of over Rs. 42,500 crore, incremental production of over Rs. 2.3 lakh crore and will create additional employment opportunities of over 7.5 lakh jobs, Thakur said. The PLI scheme for automobile and drone industries is part of the overall announcement of PLI schemes for 13 sectors made earlier during the Union Budget 2021-22, with an outlay of Rs. 1.97 lakh crore. The scheme for the auto sector envisages overcoming the cost disabilities to the industry for the manufacture of advanced automotive technology products in India. The incentive structure will encourage industry to make fresh investments for the indigenous global supply chain of Advanced Automotive Technology products, Thakur said. The scheme for the auto sector is open to existing automotive companies as well as new investors who are currently not in automobile or auto component manufacturing business. The scheme has two components - Champion OEM Incentive Scheme and Component Champion Incentive Scheme. The Champion OEM Incentive scheme is a sales value linked' scheme, applicable on Battery Electric Vehicles and Hydrogen Fuel Cell Vehicles of all segments, the minister said. The Component Champion Incentive scheme is a sales value linked' scheme, applicable on Advanced Automotive Technology components of vehicles, Completely Knocked Down (CKD)/ Semi Knocked Down (SKD) kits, vehicle aggregates of 2-Wheelers, 3-Wheelers, passenger vehicles, commercial vehicles and tractors. This PLI scheme for automotive sector along with the already launched PLI scheme for Advanced Chemistry Cell (Rs. 18,100 crore) and Faster Adaption of Manufacturing of Electric Vehicles (Rs. 10,000 crore) will enable India to leapfrog from traditional fossil fuel-based automobile transportation system to environmentally cleaner, sustainable, advanced and more efficient Electric Vehicles (EV) based system.
- 9) India's wholesale inflation rose to 11.39 per cent in August, data released by the Ministry of Commerce & Industry showed. The wholesale price index (WPI) grew 11.16 per cent during the month of July, while the WPI for June was 12.07 per cent, the data showed. "The high rate of inflation in August 2021 is primarily due to rise in prices of non-food articles, mineral oils; crude petroleum & natural gas; manufactured products like basic metals; food products; textiles; chemicals and chemical products etc as compared the corresponding month of the previous year," the ministry statement said.
- 10) India's retail inflation in August marginally eased to 5.3 percent, staying within Reserve Bank of India's comfort zone for a second month, government data showed on Monday. The retail inflation based on the Consumer Price Index (CPI) was 5.59 percent in July and 6.69 percent in August 2020. As per the data released by the National Statistical Office (NSO), inflation in the food basket was 3.11 percent in August compared to 3.96 percent in the preceding month.
- 11) India Ratings and Research (Ind-Ra) has maintained a stable outlook on the overall banking sector for the rest of FY22, supported by the continuing systemic support. This support has helped manage the system-wide Coronavirus (Covid-19) pandemic linked stress. The rating agency has kept its FY22 credit growth estimates unchanged at 8.9 per cent for FY22, supported by a pick-up in economic activity post Q1FY22, higher government spending, especially on infrastructure and a revival in demand for retail loans. The agency estimates Gross Non-performing Assets (GNPAs) at 8.6 per cent for FY22, up from 7.7 per cent in FY21. The stressed assets at 10.3 per cent for FY22 from 8.6 per cent in FY21. The agency in a statement said banks also continue to strengthen financials by raising capital and adding to provision buffers which have already seen a sharp increase in the last three to four years. The agency expects provisioning cost to increase to 1.9 per cent from its earlier estimate of 1.5 per cent for FY22. The sector's profitability is expected to improve in FY22 driven by enhancement in the financial profile of public sector banks.
- 12) India's GDP growth touched a record high on low base in Q1FY22 led by a rebound in consumer spending, and improved manufacturing in spite of a devastating COVID-19 second wave, government data showed on Tuesday. Gross domestic product rose 20.1% in the three-month period, compared with a record contraction of 24.4% in the same quarter a year earlier. "GDP at Constant (2011-12) Prices in Q1 of 2021-22 is estimated at Rs. 32.38 lakh crore, as against Rs. 26.95 lakh crore in Q1 of 2020-21, showing a growth of 20.1 percent as compared to contraction of 24.4% in Q1 2020-21. Quarterly GVA at Basic Price at Constant (2011-12) Prices for Q1 of 2021-22 is estimated at Rs. 30.48 lakh crore, as against Rs. 25.66 lakh crore in Q1 of 2020-21, showing a growth of 18.8%," said Ministry of Statistics & Programme Implementation in a statement. Manufacturing, which fell 36 percent in April-June last year, bounced back to grow by 49.6 percent. Trade, hotels, transport, communication and services related to broadcasting, which tanked 48.1 percent in April-June last year, grew by 34.3 percent in Q1FY22, indicating that touch services sectors like hotels, hospitality and tourism continue to be affected by the Covid-19 pandemic and will take time to recover. Agriculture, the only sector which showed growth in Q1FY21 at 3.5 percent, grew by 4.5 percent in the first quarter of FY 22.

## Global markets

- 1) Inflation in the euro area accelerated more than expected to the highest level in 13 years. Consumer prices rose 3.4 percent in September, compared with an estimate for a 3.3 percent gain, according to figures released by Eurostat on Friday. A measure stripping out volatile components such as food and energy climbed to 1.9 percent, a rate not seen since 2008. Price growth is driven mainly by effects related to the pandemic and the reopening of economies after long stretches of virus shutdowns. The European Central Bank expects a peak only later this year, before a slowdown in 2022.
- 2) China is facing power crisis which is triggering blackouts for households and forcing factories to cut production, threatening to slow the country's vast economy and place even more strain on global supply chains.
- 3) The Chinese real estate developer Evergrande (loaded with heavy debt) said it would make some interest payments. Jerome Powell said the Evergrande situation seems very particular to China, which has very high debt for an emerging market economy," adding that the company's distress does not appear to pose a risk to major U.S. or Chinese banks.
- 4) Ratings agency Fitch had earlier cut its growth forecast for China's economy this year citing a slowdown in the country's colossal property sector, which is also facing headwinds over faltering real estate giant Evergrande. Fitch Ratings said it expected growth to come in at 8.1 percent this year, compared with a previous 8.4 percent estimate, saying the "main factor weighing on the outlook is the slowdown in the property sector".
- 5) Rampant spread of COVID-19 Delta variant in various countries, concerns of likely reduction in asset purchases in US, regulatory crackdown in China and tensions in Afghanistan and its side effects would act as an overhang.
- 6) China's economic data is not encouraging owing to the impact of localised lockdowns following COVID-19 outbreaks resulting into high raw material costs and disruption in supply chain. Retail sales grew at the slowest pace since August 2020, while industrial output also rose at a weaker pace from July which affected investor sentiments. Earlier, China's factory activity expanded at a slower pace in August, while the services sector slumped into contraction, as coronavirus-related restrictions and high raw material prices pressure businesses in the world's second largest economy. The official manufacturing Purchasing Manager's Index (PMI) was 50.1 in August from 50.4 in July, data from the National Bureau of Statistics (NBS) showed on Tuesday. China staged an impressive recovery from a coronavirus-battered slump, but growth has recently shown signs of losing steam due to domestic COVID-19 outbreaks, slowing exports, tighter measures to tame hot property prices and a campaign to reduce carbon emissions. Earlier, Goldman Sachs Group Inc. downgraded its economic growth forecast for China as measures to contain the fast-expanding Covid-19 resurgence curb spending. The economists cut their projection for quarter-on-quarter growth of gross domestic product in the third quarter and also lowered their full-year GDP growth forecast to 8.3% from 8.6%.
- 7) Factory-gate price inflation in China remained high in August, rising to the highest level in 13 years, data released on Thursday showed. The producer price index (PPI), which reflects the prices that factories charge wholesalers for their products, rose by 9.5 per cent in August from a year earlier, from a gain of 9 per cent in July, the National Bureau of Statistics (NBS) said.

## Ajcon Global's observations and view..

- 1) Indian domestic bourses were under pressure last week and started October too on a weak note led by weak global cues. However, midcaps and smallcaps continue to be in green.
- 2) Before the correction, the bulls have been in command led by strong vaccination drive, good economic activity, Production Linked Incentive Schemes announced in various sectors, recent Services PMI data was also good, strong Q1FY22 GDP numbers and GST collection in August 2021 continued to be robust. The big bang reforms in Telecom sector has already uplifted investor sentiments for telecom related companies. Bulls will have an edge owing to factors like good Q1FY22 earnings season so far with most of the Companies reporting good performance, strong management commentary in Q1FY22 by majority of the Companies, growth in Industrial production and ease in retail inflation expansion. In addition to liquidity provided by FPIs in equities, there is good spike in retail participation from Tier II and Tier III cities as people have become more financial literate in COVID-19 crisis. In addition, the country gearing up and taking all the measures to prepare itself for likely third COVID-19 wave. Q2FY22 results of majority of the Companies are expected to be strong.

**AJCONGLOBAL**

YOUR FRIENDLY FINANCIAL ADVISORS

- 3) We suggest investors to be careful about the forthcoming IPOs too and understand the fundamentals before riding the boom. Subdued listing of IPOs in August 2021 suggest irrational exuberance. However, IPOs of sectors in limelight like Speciality chemicals, Companies business model suited to demands of Electric Vehicles would always gain maximum attention. It is advisable for investors to look out for stock specific opportunities. We believe corrections like today will keep markets healthy.
- 4) Going ahead, investors will keep an eye on RBI's Monetary policy, Monthly auto sales numbers, Q2FY22 earnings season and management commentary, economic activity in the festive season especially during Navratri and Diwali, eye on COVID-19 cases especially in the Metros and vaccination drive, movement in crude oil prices and metals. Globally, investors will keep a watch on US Treasury yields, US employment data and developments in China.
